

The benefits of converting to natural gas really add up.

Get cash rebates when you use natural gas.*

Appliance	Required Minimum Efficiency	Rebate Amount
Space Heating		
Hot Air Furnace	92% AFUE**	\$1,000
Hot Air Furnace w/ ECM***	92% AFUE	\$1,000
Hot Water Boiler	85% AFUE	\$1,000
Steam Boiler	82% AFUE	\$1,000
Water Heating		
Storage Tank Water Heater (55 gallons or less)	0.64 UEF [†] or 0.67 EF [‡]	\$800
Storage Tank Water Heater (More than 55 gallons)	0.78 UEF or 0.77 EF	\$800
Tankless Water Heater	0.87 UEF or 0.90 EF	\$1,000

*Installed between January 1 and December 31, 2019.

**Annual Fuel Utilization Efficiency

***Electronically Commutated Motor

[†]Uniform Energy Factor

[‡]Energy Factor

The Natural Gas Conversion Program is for space- and water-heating appliances only. You may be eligible for additional equipment rebates through other National Fuel rebate programs.

Residential Customers: Rebate offers listed are available for qualifying equipment installed between January 1, 2019, and December 31, 2019. All equipment must be installed by a contractor. Contractors must be able to supply one of the following for any rebate application to be considered complete: Federal ID number, a Certificate of Insurance or a Business Certificate showing their company's name and address. Rebates are available for new equipment only. For propane and oil conversions, only new furnaces/boilers/water heaters qualify for a rebate. Modifications to existing equipment, including burner replacement and orifice changes, do not qualify. New builds are not eligible for rebates. Terms and conditions apply.

To learn more about what equipment qualifies, visit ConvertToNationalFuelGas.com.

Smell gas? Leave fast! Then call 1-800-444-3130

If you smell rotten eggs, it could be a natural gas leak. Leave the premises immediately and contact National Fuel from a different location.

For gas emergencies, call 1-800-444-3130 24 hours a day, 7 days a week.

Get started! It's easy. It's affordable. It's natural.

Visit ConvertToNationalFuelGas.com to learn more about the National Fuel Natural Gas Conversion Rebate Program and to download a rebate application to get the conversion process started. If you have any questions, please call 1-800-343-4568.

The Natural Gas Conversion Rebate Program

Converting to natural gas has never been easier—or more affordable.

The Natural Gas Conversion Rebate Program

National Fuel's Natural Gas Conversion Rebate Program offers new heating and water-heating customers several money-saving rebates for switching to natural gas from an alternative source. When you combine rebates with the projected annual savings for using natural gas, you'll question why you didn't convert to natural gas years ago.

You can save more and use less with natural gas.

If you're using oil, propane or electricity, you could be leaving money on the table. Natural gas is a safe, efficient and reliable fuel source. Plus, because it's an abundant, domestically produced resource, natural gas is more affordable than any other option.

With the Natural Gas Conversion Rebate Program, National Fuel is providing homeowners with the best way to heat their homes and their water, while saving them money on their bills month after month. Whether you're a current National Fuel Gas customer or a new customer, the Natural Gas Conversion Rebate Program applies to anyone who decides to convert their space- or water-heating equipment to natural gas.

By using natural gas, you could help protect the environment.

Natural gas is among the cleanest energy sources available. According to the U.S. Environmental Protection Agency, natural gas produces a significantly smaller amount of greenhouse gases, particulates and mercury compared to other sources of energy. By converting to natural gas, you not only help your wallet, you help reduce emissions. That makes the air cleaner for everyone. It's something that will help your children and generations to come.

It's that easy to start saving money!

It's never been easier. Convert to natural gas to start saving now—and for years to come.

An example of potential savings:

	Converting from		
	Propane	Oil	Electric
New 92% High-Efficiency Gas Furnace	\$3,500	\$3,500	\$3,500
Interior House Piping Cost	<u>+\$200</u>	<u>+\$200</u>	<u>+\$200</u>
Total Furnace and Gas Piping Cost*	\$3,700	\$3,700	\$3,700
One-Time Conversion Rebate	<u>-\$1,000</u>	<u>-\$1,000</u>	<u>-\$1,000</u>
Net Cost after Rebate	\$2,700	\$2,700	\$2,700
Estimated Annual Fuel Savings**	\$1,100	\$860	\$2,160
Conversion Payback (Years)***	2.4	3.2	1.2

*Does not include National Fuel cost for main line or service line if required.
 **For example only. Actual investment and savings may be higher or lower depending on the models you choose to install, the efficiency of the furnace you are replacing, fluctuating fuel costs and your actual installed cost.
 ***With estimated annual savings for each fuel conversion as shown (propane, oil or electric), the \$2,700 net cost for the new gas furnace and interior house piping after the rebate will be paid back in 1.2 to 3.2 years.
